**OUT OF THE DARK: ASTRONOMY AS UNIFYING THREAD FOR CULTURES.**

## ***Cosmonova – Cinema. Stockholm***

### **360 degrees cinema at the Natural History Museum**

**Authors:** Erika Strålberg, Kristin Österberg

#### ***Introduction***

As part of our *Out of the dark* project we have included cultural activities such as visits to museums where we can visit exhibitions, sometimes related to Astronomy, and other times to publicize part of our history and / or culture to the teams of the partner schools.

At the Natural History Museum in Stockholm there is a 360 degree cinema, having a screen covering your whole sight, 360 degrees, from floor to ceiling.

We went there to see the movie "*Cosmos, the eternal journey*" during the first Learning, teaching and training activity celebrated in Eskilstuna in May 2018.

In the movie, we went from Earth, and travelled to the edge of the universe. The film helped in our project "Out of the dark" since it brought knowledge and light into the dark sky.

It showed how alone we are in the universe, but also how exciting the universe is, and how much there is left to explore.

### ***Results***

Knowledge and feelings to bring further on in the project and motivate our students.

### ***Conclusions***

Wonderful that all students had the possibility to experience the fantastic Imax Cinema.
