OUT OF THE DARK: ASTRONOMY AS UNIFYING THREAD FOR CULTURES.

Musical “Hair”

Performed by high school students

Authors: Erika Strålberg, Kristin Österberg

Introduction

As part of our *Out of the dark* project we have included cultural activities such as performances and workshops in our cities to present part of our history, culture and daily life to the teams of the partner schools. In some cases, we have met students from other schools in our neighborhood during the Learning, teaching and training activities, increasing the impact and dissemination of this meetings.

When the headmaster of the programme of performance at the nearby high school St Eskil heard we were receiving international guests he immediately invited the whole group to see the musical Hair, performed by there last year students.

Friday afternoon we all went to the theatre to see the musical “Hair”.

In the last year students at the performance programme at high school produce a theatre or musical. This year they produced the musical *Hair*. They usually invite eight-graders from different schools to see the show and now they also invited the *Out of the dark*-project.

Results

An easy cultural event, suiting all ages.

Conclusions

A project like *Out of the dark* is extremely intensive. The schedule for each day is very tough, and it is difficult to get enough sleep, as well as time for reflection. An activity like this is very good to have in the timetable, since it gives everybody some kind of relaxation and a good laugh.

Thanks

Our greatest thanks to the students and teachers at the programme of “Performance” at the school of St: Eskil.
