

ERASMUS+ 2017-1-ES01-KA219-038074_1
OUT OF THE DARK: ASTRONOMY AS UNIFYING THREAD FOR CULTURES.

Visit in Gualdo Tadino
Reception at the Town Hall

AUTHORS: Italian students and teachers participating to the Erasmus+ project

Introduction

This is one of the activities related to the dissemination of the project. All students and teachers were received to the Town Hall and welcomed by the Mayor. We were given some information about the town, its history, economy and the present economic crises that is going on at present.

The Mayor recognized the importance of such projects which give young people the chance to meet and to learn about other cultures, especially for a place far from great cities and geographically isolated. All visitors received some presents from the municipality.

Once arrived at the Town Hall, the Major welcomed us: students and teachers showed the project, its activities and impact.

Everybody could know a bit more about the town and the importance of international exchanges.

Conclusions

It is always important to visit the municipality of the town where the meeting takes place because this gives the opportunity to know about the history, the religion, the art and the way of living of its population in a place different from the usual school environment.

Thanks

The Mayor and the other representative of the Municipality that received us at the Town Hall.
